About us

BioCure Health's Philosophy

BioCure Health is revolutionizing the field of age management and longevity, setting a new benchmark standard for healthcare delivery across the country. As a nationwide telehealth clinic, we're not merely just a medical service, we're changing the face of at-home medicine.

BioCure Health is committed to innovation, accessibility, and personalized care, becoming an essential component for those seeking to optimize their health and extend their vitality. By focusing on advanced age management and longevity therapies, BioCure Health addresses the root causes of aging, offering treatments and therapies that are tailored to individual needs.

Age on
Your
Terms!

Our programs not only enhance accessibility, but also ensures the highest levels of comfort and privacy. You can engage in in-depth consultations with your healthcare providers, receive personalized care plans, and even have medications and supplements delivered directly to your doorstep, all without the inconvenience of having to sit in a waiting room. The impact of BioCure Health's innovative approach extends beyond individual patient care.

BioCure's At Home Easy 5-Step Process

At BioCure Health, we make taking control of your health easy and convenient.

Our telehealth services offer personalized care from the comfort of your home with a simple 5-step process, eliminating the need for in-person visits.

1 Initial Provider Consultation

Schedule a video conference with your assigned specialist to examine your symptoms, goals and lifestyle.

2 Diagnostic Exam

Specialized diagnostic testing designed just for you. Results arrive within 14 days and are accompanied by a comprehensive review and recommendations.

3 One-on-One Consultation

A scheduled video conference with your assigned specialist to discuss your blood work results and health goals, answer any questions you may have, and review your custom treatment protocol.

4 Treatment Protocol Review

Receive your entire treatment protocol from our partner pharmacies and supplement companies to be delivered directly to your home. Conveniently and discreetly.

5 Ongoing Follow Ups

With our team approach, we will schedule monthly follow ups to track your progress, answer any questions, and modify treatment as needed to help you reach your goals.

TESTOSTERONE THERAPY

At BioCure Health, we understand the transformative power of testosterone therapy in restoring vitality and enhancing quality of life. Our personalized testosterone therapy programs are designed to address symptoms of low testosterone, such as fatigue, decreased libido, and reduced muscle mass.

With our expert guidance and cutting-edge treatments, you can experience renewed energy, improved mood, and a revitalized sense of well-being. We use the latest, medically-approved therapies to ensure safe and effective results tailored to your unique needs. Discover how BioCure Health can help you regain control of your health and live life to the fullest.

DHEA

- Supports hormone balance, mood, and overall well-being
- Available in capsules

Boron

- Supports hormone regulation, metabolism, and bone health
- Available in capsules

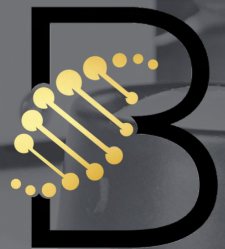

DIM

- Supports hormone balance, particularly healthy estrogen metabolism
- Available in capsules

ADVANCED DIAGNOSTIC TESTING

At BioCure Health, we provide comprehensive diagnostic testing to uncover the root causes of your health concerns and optimize your well-being. Our advanced testing services include full comprehensive male and female panels, hormone testing, micronutrient analysis, genetic testing, stool analysis, food sensitivity testing, and assessments for adrenal fatigue, among others.

By gaining a deep understanding of your unique health profile, we tailor personalized treatment plans that address specific needs and improve overall health. Whether you're looking to enhance energy, boost immunity, or achieve optimal wellness, our expert team is here to guide you with precision and care through every step of your health journey.

Diagnostic Testing

Baseline Blood Panels

Comprehensive Female Panel

A comprehensive female blood panel focuses on evaluating overall health and identifying potential issues that are particularly relevant to women's physiology, such as reproductive hormones, metabolic markers, and nutrient levels. This type of panel can be used for regular health checkups, hormone balancing, or optimization in areas like fertility, menopause, and general wellness.

Comprehensive Male Panel

A comprehensive male blood panel is a series of blood tests that evaluate a man's overall health, focusing on specific biomarkers relevant to men's physiology, including hormone levels, organ function, metabolic markers, and more. This type of panel is useful for assessing overall well-being, detecting potential health issues early, and optimizing performance and longevity.

Advanced Diagnostic Testing

Specialty Lab Panels

Micronutrients Exam

This test measures vitamins, minerals, amino acids, fatty acids, antioxidants, and metabolites and how they affect cellular function in a person. Correcting these micronutrient deficiencies not only slows down aging and degenerative disease progression, it can also prevent, as well as, repair cellular dysfunction, and by extension, disease.

Food Sensitivity Exam

This test measures the amount of IgG antibodies found in the blood for each type of food under consideration. In this way, the specific food sensitivities can be detected. In other words, it exposes your white blood cells against different types of foods to see which foods cause an immune response from your blood.

Gut Health Test

This test helps uncover problems in digestion and absorbing your food properly, potential inflammation, and a vital balance of the gut bacteria that can affect every system in your body – your gut's microbiome.

Advanced Diagnostic Testing

Specialty Lab Panels

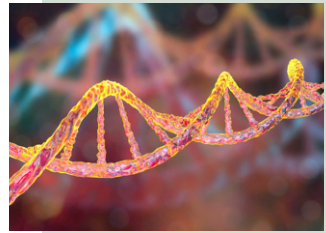

TrueAge Epigenetic Exam

Discover your biological age and take control of your future. Track how quickly you've been aging – and learn what you can do about it. This collection offers an entire suite of epigenetic aging reports and aging algorithms to provide a comprehensive picture of biological aging.

Genetic Testing and Blueprint

The 3X4 Genetics Test + Blueprint Report is a comprehensive genetic test that can help you understand your genetic makeup and its effects on your well-being. It includes personalized recommendations to help you make more informed decisions about your health.

Adrenal Fatigue & Stress

The Saliva Profile III measures the levels of four hormones in your saliva. It includes a diurnal cortisol profile, which looks at your cortisol levels at four different points during the day. This test can help identify any imbalances in your hormones, which can affect your overall health.

Advanced Diagnostic Testing

Specialty Lab Panels

Cancer Screening Galleri Test by GRAIL

What it does

- It looks for cancer signals in the blood by analyzing fragments of DNA that tumors shed into the bloodstream (called cell-free DNA).
- Using machine learning, it can detect over 50 types of cancer from a single blood draw.
- If a cancer signal is found, the test can also predict the tissue of origin (where in the body the cancer likely started).

Who it's for

- The test is intended for adults at elevated risk for cancer, usually age 50 and older, or those with additional risk factors.
- It's not a replacement for routine screenings like colonoscopy, mammograms, or Pap smears, it's meant to complement them by detecting cancers that don't have standard screening tests.

Advanced Diagnostic Testing

Diagnostic Imaging

Prenuvo Whole Body Scan

Prenuvo offers advanced whole-body MRI scans that provide a complete picture of your internal health, all in one, non-invasive session. Unlike traditional imaging that targets one area, Prenuvo scans your entire body to detect potential issues early, often before symptoms appear.

- ✓ Radiation-Free: Safe, non-invasive imaging with no ionizing radiation.
- ✓ Comprehensive: Scans brain, spine, organs, and over 200 conditions in a single session.
- ✓ Preventive Care: Detects cancers, aneurysms, spinal conditions, metabolic and chronic diseases.
- ✓ Fast & Efficient: Whole-body scan completed in about one hour.
- ✓ Peace of Mind: Receive a detailed digital report, reviewed with your doctor.

Who is it For?

- Individuals looking for early detection and prevention.
- Patients with family history of disease.
- Health-conscious individuals focused on longevity and proactive care

SUPPLEMENTATION

At BioCure Health, our supplement therapy offers a science-backed approach to supporting overall wellness and optimizing health. Our personalized supplement regimens are designed to complement your body's unique needs, targeting areas such as immune support, energy enhancement, and metabolic balance.

Our advanced B-complex supplement is meticulously crafted with a synergistic blend of B-vitamins for optimal metabolism support, brain function, and stress resilience. Elevate your energy levels, enhance mental clarity, and nourish your body with B-Elite - your essential partner for peak performance and well-being!

REGENERATIVE MEDICINE PROCEDURES

At BioCure Health, we specialize in advanced regenerative therapies designed to rejuvenate and restore your health. Our offerings include stem cell treatments that utilize the body's natural healing processes to repair damaged tissues. We also provide Platelet-Rich Plasma (PRP) and Platelet-Rich Fibrin Matrix (PRFM) therapies, which use your own blood components to enhance recovery and tissue regeneration. Our intravenous (IV) therapy delivers regenerative cells and other compounds directly into your bloodstream, promoting overall vitality and wellness.

With our comprehensive approach to regenerative medicine, we are dedicated to helping you achieve optimal health and a renewed quality of life. Experience the benefits of our innovative treatments and take the next step toward a healthier you.

Regenerative Medicine Services

Regenerative Cell Therapy

The Regenerative Cell Matrix at BioCure Health represents a groundbreaking approach to restoring and rejuvenating damaged tissues. By harnessing the body's innate healing capabilities, our stem cell treatments introduce specialized cells that can differentiate into various types of tissue, promoting repair and regeneration where it's needed most. This innovative therapy aims to address a range of conditions by stimulating natural healing processes, reducing inflammation, and enhancing overall function.

Platelet-Rich Plasma (PRP)

Platelet-Rich Plasma (PRP) therapy at BioCure Health leverages the healing power of your own blood to promote recovery and regeneration. By concentrating platelets and growth factors from your blood, PRP therapy enhances your body's natural healing processes, improving tissue repair and reducing inflammation. This minimally invasive treatment is designed to address various conditions, including joint pain, muscle injuries, and skin issues, by stimulating cell growth and tissue repair.

Regenerative Medicine Services

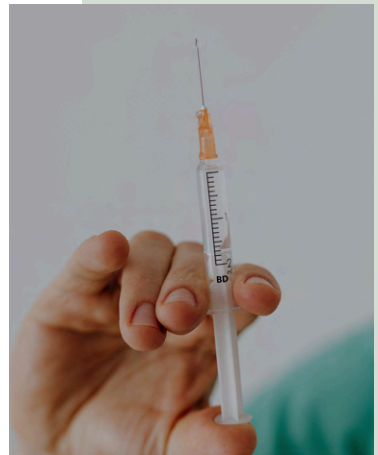

Platelet-Rich Fibrin Matrix (PRFM)

Platelet-Rich Fibrin Matrix (PRFM) therapy at BioCure Health is a sophisticated treatment that maximizes your body's natural healing capabilities. By utilizing a higher concentration of platelets and fibrin derived from your own blood, PRFM creates a supportive matrix that encourages tissue repair and regeneration. This advanced therapy not only accelerates healing but also improves the quality and strength of the newly formed tissue.

Anti-Inflammatory Injections

Anti-inflammatory injections at BioCure Health provide targeted relief for chronic inflammation and pain. By delivering powerful anti-inflammatory medications directly into affected areas, these injections address the root causes of discomfort, reduce swelling, and improve joint and tissue function. This effective treatment is designed to alleviate symptoms and support recovery in conditions such as arthritis, tendonitis, and other inflammatory disorders.

REAL STORIES, REAL RESULTS

At BioCure, nothing speaks louder than the experiences of our clients. We take pride in helping individuals achieve their health and wellness goals, and their feedback reflects the impact of our personalized care and innovative treatments. Below, you'll find a selection of real reviews along with hundreds on Google, from those who have trusted us with their well-being, sharing their stories of transformation and success with BioCure Health.

Anita C.

The stem cell injection administered at your office was a breeze. I felt no discomfort or pain afterward, and I noticed that walking was less of an effort for me that same day.

On day six after your treatment, I felt no hip pain at the end of my busy day, which I would normally feel.

I have joined a gym and have used the recumbent machine for 40 minutes at least three times a week and have had no pain in my left hip at all. I have even gone on the treadmill for five minutes after the recumbent machine and have felt no pain whatsoever.

I am most grateful for the amazing results of my left hip stem cell injection from you, Dr. Rosado.

I highly recommend this wonderful treatment. It has given me a "new lease on life". Thank you again, Dr. Rosado.

Adam W.

Dr. Rosado and his team at BioCure Health are truly changing lives. At a time when sick care and symptom treatment is considered "health care," the work they are doing at BioCure is absolutely necessary for individuals seeking to optimize longevity and their sense of well-being.

At 40 years old, I've never felt better! Dr. Rosado is as genuine as they come. His knowledge of human biology and optimization is only matched by his heart, personalized care for his patients, and the authenticity he exudes in wanting to share deep healing with the world. Because of this, I recommend all my customers, friends, and family to his practice. If you're on the fence, I 100% recommend giving his office a call for a consultation. Every single person I've sent his way has thanked me!

Claudia S. ★★★★★

I started 2024 with one goal in mind, which is to get healthy! I heard from a few of my friends about BioCure Health and all of the success that they have had with a few of their treatment programs. I decided to schedule a telemedicine consult and it was one of the best decisions I've ever made. From the initial contact with the clinic staff to my interaction with the doctors, plus the amazing follow ups. They have genuinely exceeded all of my expectations. Not only do I feel healthier, but I am also empowered with all the patient education they provide. It's amazing that it is all done from the comfort of my home. Thanks BioCure Health!

Meet the Founders

Dr. Joaquin Rosado

Dr. Vaneza Chaple-Rosado

As Co-founders of BioCure Health, Dr. Joaquin Rosado, Dr. Vaneza Chaple, and their distinguished team of medical professionals are at the forefront of a transformative nationwide clinic specializing in regenerative medicine and longevity. Our mission is to redefine wellness by offering state-of-the-art treatments that not only enhance vitality but also promote healing and optimize overall well-being.

We leverage the latest advancements in regenerative medicine, including cutting-edge Peptide Therapies, Hormone Optimization, and advanced Genetics & Methylation testing. These innovative modalities allow us to tailor personalized treatment plans that address individual health needs and goals. By integrating these breakthrough approaches, we help our patients achieve remarkable health outcomes that were once thought unattainable. At BioCure Health, we are dedicated to pushing the boundaries of conventional medicine to help you attain your highest level of health and vitality.
